

REMARKS

Claims 1 and 12-27 are pending.

The indication that the application is in condition for allowance except for various informalities is gratefully acknowledged.

The Action indicates that claim 21 needs to be amended because the term "automated storage server" lacks antecedent basis in the specification. However, this term is mentioned at several portions of the specification, e.g., numbered paragraph [0096] and numbered paragraph [0100].

Further, Assignee notes that there is no requirement that the terminology in the claims be identical to that in the specification. Further, 37 CFR 1.121(e) merely requires *substantial* correspondence between the language of the claims and the language of the specification.

The Action additionally requires that the specification and claim 21 be amended to include the term "comprising a memory". Both the specification and the claim 21 recite "storage" in various places, so it is unclear to Assignee what the Examiner finds objectionable.

If the Examiner finds that amendments still need to be made to correct informalities; he is invited to contact the undersigned at the number given below.

Fees

No fees are believed due with this submission. However, the Commissioner is hereby authorized to charge any fees or credit any overpayment to Deposit Account No. 50-3447.

Conclusion

It is respectfully submitted that the application is in condition for allowance, and notice to that effect is respectfully requested. .

Assignee respectfully submits that this Response is being submitted in accordance with 37 C.F.R. 1.34 by a registered patent practitioner acting in a representative capacity for Assignee.

Respectfully submitted,
